

Crystal ScaleStop Plus

No-salt alternative to a softener

No salt
No electricity
No waste water
No moving parts

- Reduce scale in appliances & plumbing
- Reduce spots on glasses & shower doors
- Reduce soap usage
- Filtered, chlorine-free water – all faucets
- Healthy skin without itching
- Environmentally friendly

How it Works

Stage 1: Carbon Filtration

Calgon™ aspirated carbon reduces chloramines and extends life of TAC media.

Stage 2: Sediment Filtration

Appliances, toilets & fixtures are protected from damaging dirt, rust and other particles.

Stage 3: Template Assisted Crystallization (TAC media)

Attracts hardness minerals, transforms them into harmless microscopic crystals that break away and stay suspended in water, unable to form hard scale.
