

Crystal **OPTIMUM** RO System

Uses 75% less water
Certified performance
Easy maintenance

The Crystal **OPTIMUM** RO System puts you in control of water quality, offering certified performance and peace of mind that your family is protected.

It uses 75% less water than other RO systems... and maintenance couldn't be easier with the unique "click and enjoy" cartridge feature.

The Crystal **OPTIMUM** RO System

Filter Change Reminder
Signals time to change filters

Space Saving Design
Compact manifold assembly

3/8" push fit connections
High flow at your faucet

Purity Monitor
Test the quality of your drinking water anytime

Double Seal Protection
The double o-ring design optimizes a tight seal to ensure leak-protection

GRO Technology High Efficiency Membrane
Uses 75% less water than other RO Systems with its industry-leading 1:1 high efficiency design

Easy Cartridge Change
Click-in cartridge for easy replacement. Encapsulated cartridge stops contaminants from entering your water. 5 cartridge options to meet your changing needs.

Water Supply Valve
Dripless shutoff for easier filter changes

Color Coded Sequence
Match up cartridge colors to the system for the proper filtration sequence

4.4 Gallon Storage Tank
Automatic shutoff conserves water when storage tank is full

Certified and trusted to reduce impurities

⁸²
Pb

Lead

Safeguard your family from harmful contaminants like lead.

VOC & Industrial Contaminants

Volatile organic chemicals include components of gasoline and industrial cleaners, which can cause many illnesses.

CYST

Reduce cysts such as Cryptosporidium and Giardia which could cause negative health effects.

Sediment

Discolored water which can be caused by dirt, sand and rust.

Chlorine, taste & odor

Chlorine, commonly used by municipalities to disinfect the watersupply, often causes poor tasting and intolerable odors in water.

Lindane & atrazine

Eliminate poor tasting and intolerable odors in water which can be caused by agricultural contaminants.

NSF Certification

Certified by NSF International against NSF/ANSI Standard 42, 53, 58 and CSA B483.1. NSF International is the most respected, independent third-party organization dedicated to the health and safety of the public. See Performance Data Sheet for details.

Options

Booster Pump Options

The booster pump is designed to increase incoming pressure to provide these key advantages...

- Better purity
- Faster flow at the faucet
- Faster production
- Works in low-pressure applications where standard RO systems don't work

High-Flo Designer Faucets

See our companion brochure for a variety of designs and finishes

Fridge Connections

Provides crystal clear water to your fridge icemaker and water dispenser

Granite Counter Installs

Our technicians are specially equipped and trained to install in granite countertops

14 Gallon Storage Tank

Upgrade to a larger tank for larger families, when you need more water and more flow at the faucet

How it works

- 1 **Sediment & Carbon Block Cartridge** screens out particulates such as dirt, sand or rust and removes chlorine to extend RO membrane life.
- 2 **GRO 75 Gal Per Day Reverse Osmosis membrane** effectively removes up to 98% of Total Dissolved Solids.
- 3 **Lead & Chemical Carbon Block Cartridge** effectively reduces lead, volatile organic chemicals (VOCs) and other industrial chemicals.
- 4 **Taste & Odour Post Filter Cartridge** absorbs any residual taste and odor just before the water is delivered through the faucet.

Enjoy the benefits of purified water...

Better Beverages

Crystal clear ice cubes, fresher tea and coffee. Healthier baby formula.

Better Cooking

Enhances the natural flavour of vegetables, soups and pastas.

Protects Appliances

No more scale in your teakettle, coffee maker and steam iron.

Better Health

Boosts energy level, helps in weight loss and maintains muscle tone
